ABOUT US

As an international provider, leveraging on our strategic position, we make the most of intermobility.

Nowaday, after 50 years, we cover all Europe, **from north to south including the Mediterranean area**, always looking for the most sustainable way of transportation: our favorite choice is intermodal transportation (road, sea, rail). Around these connection lines we have then developed a wide range of services to support the supply chain of our customers at every level and in every market (national and international):

real estate logistics, 4PL, contract logistics, distribution and freight forwarding.

CERTIFICATIONS

ISO 9001 CERTIFICATION

Quality management standards to help work more efficiently and Reduce product failures.

ISO 14001 CERTIFICATION

Environmental management standards to help reduce environmental Impacts, reduce waste and be more sustainable

HACCP

HACCP is a systematic preventive approach to food safety from biological, chemical, and physical hazards in production processes that can cause the finished product to be unsafe and designs measures to reduce these risks to a safe level.

SQAS SYSTEM

SQAS (Safety & Quality Assessment for Sustainability) is a system of uniform third party assessments to evaluate the performance of Logistics Service Providers and Chemical Distributions.

IATA CERTIFICATION

IATA certification services enable you to demonstrate that your systems, products, processes or services are compliant with international regulations, standards and best practices.

A.E.O CERTIFICATION

The EU established its AEO Programme based on the internationally recognised standards. It is a partnership programme between the customs authority and the economic operators

GDP CERTIFICATION

Good distribution practice (GDP) describes the minimum standards that a wholesale distributor must meet to ensure that the quality and integrity of medicines is maintained throughout the supply chain.

SERVICES

LOGISTICS

It includes the widest variety of activities: **from finding the right location for the warehouse, to building it;** from consultancy to improve an existing service to its re-configuration and management.

Through intermodal transport our organization delivers your goods anywhere. Thanks to a well- equipped fleet, we deliver all types of goods: **clothes and food, ADR and auto parts, whether it's a full load or partial load.**

TRANSPORTS

DISTRIBUTION

Having an efficient supply chain also means creating a network that delivers every day wherever it is needed. A key service for large-scale distribution, food and beverage, auto parts, etc.

Being part of a global network we can ship your goods anywhere.

The management goes beyond that of transport, we take care of customs formalities , and of the entire process.

FREIGHT FORWARDING

LOGISTICS : SPECIALIZED SERVICES

There are different types of logistics, each of them have its own features.

Our expertise is to implement suitable technologies to optimize the entire **supply chain** management including its various segments.

Whitegoods

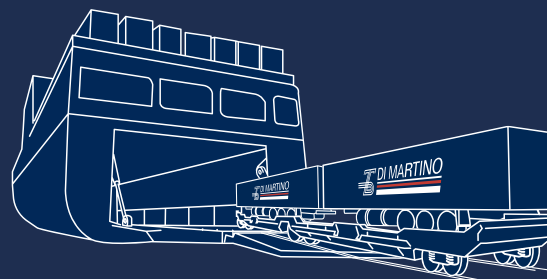

MULTIMODAL TRANSPORT OPERATOR (MTO)

We combine road transport, necessary for the first and last mile, with rail and sea transport, more sustainable solutions. Thanks to this strategy we reduce CO2 emissions by at least **25%** in each transport.

ROAD TRANSPORT

- Flexible route
- Fast times
- Easily configurable
- Door to door services
- Suitable for short distances
- Feeds every other mode

SEA TRANSPORT

- Cheaper than a full road transport
- More sustainable way
- Wide naval ports networks
- Frequent connections

RAIL TRANSPORT

- Reliable
- On time
- Safe
- Faster for long distances
- Reduced environmental impact
- Convenient price

SUSTAINABILITY

OUR SUSTAINABLE FLEET

Since the end of 2017 we have increased our fleet investing on LNG trucks, are even more sustainable than EURO VI.

Today the fleet boasts 40 Iveco 480 hp tractors powered by LNG (fossil methane).

-15%

VS.EURO VI

EMISSIONS CO₂

Significant reduction compared to the latest generation diesel trucks (EURO VI)

-70%

VS.EURO VI

NO_x

Reduction of nitrogen oxides emitted

-99%

VS.EURO VI

Air Pollution

Air Pollution is reduced substantially, almost to zero.

-30%

VS.EURO VI

Noise

These trucks are also extremely silent (-5dB)

LNG:PLUS

BUILDING TOGETHER A SUSTAINABLE TRANSPORT PLAN

HIGH PERFORMANCE

The future of the whole road is considered: with the same tank LNG medium travels longer distances. **The slim and agile drive also allows for quick shooting and acceleration.**

RELIABLE

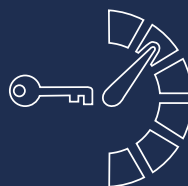

Each vehicle has an estimated useful life of about 15 years, and manages to cover a long range: **this is witnessed by large investments for LNG blue corridors in the main European directives.**

CLEAN

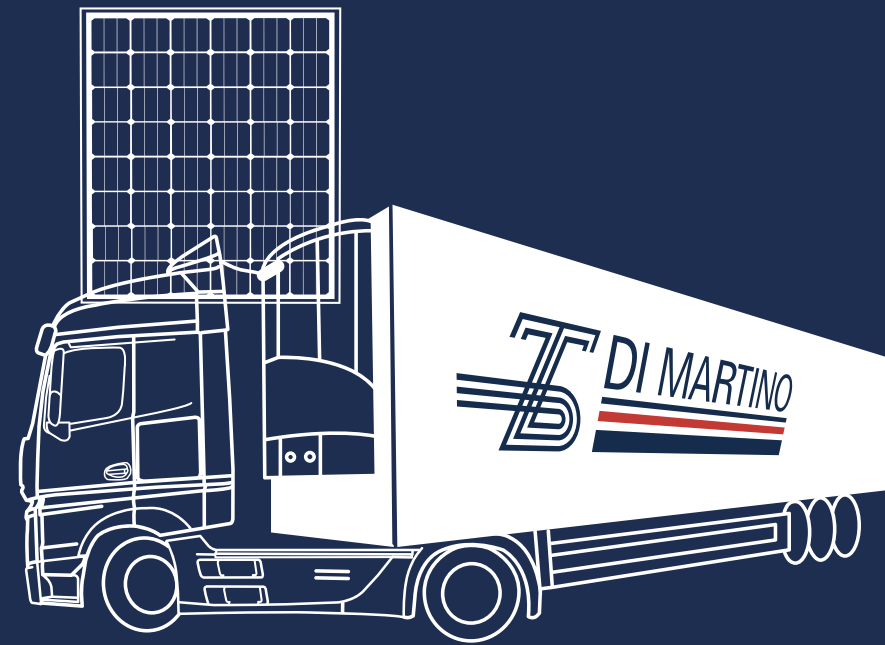

The real reduction in environmental impact makes **the LNG road a sustainable alternative that does not require oil or derivatives.**

NOISELESS

Reduced environmental impact **also from the point of view of noise pollution.**

REFRIGERATED TRUCK

INTERMODAL TRANSPORT MODE

REFRIGERATED AND INSULATED

We have extended our mission of eco-sustainable transports to the **Health Care, Chemical and Food** sectors by combining the needs of **controlled temperature and isothermal conditions with intermodal transport mode** (Short Sea Ro-ro, Rail).

Fleet

Our fleet is equipped to face up temperature-controlled and isothermal transport's needs dedicated to the Health Care, Chemical and Food market.

We dedicate the fleet to your deliveries, offering the customer the best eco-sustainable solution

FTL

INTERMODAL TRANSPORT

Our core business is intermodality. With more than 150 refrigerated cargo units we can deliver by ship to every Mediterranean country and by rail throughout Europe

If your requests are not compatible with generalist carrier, we can offer you specialized services

EURO-MED FACILITIES

LNG

Intermodal transport includes not only the train and the ship, but also the road : in order to make even the first and last road mile more sustainable we have integrated LNG vehicles into our fleet

REFRIGERATED TRUCK: MARKET ORIENTED

THE HEALTH CARE, CHEMICAL AND FOOD SECTOR REPRESENTS ONE OF THE STRATEGIC PRIORITIES OF THE DI MARTINO GROUP

For this reason we have planned important investments to offer an excellent service for the transport of **food, pharmaceutical, cosmetic and electro-medical products at controlled temperature and isothermal.**

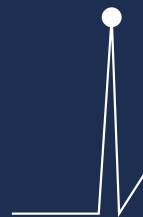

LOOK AT OUR STRENGTHS

Traceability of transports, at all times, up to delivery to the final recipient.

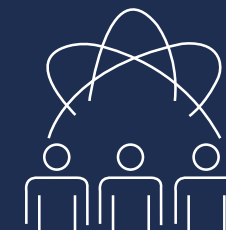

The optimization of loading times through the provision of load units in stand-by;

Effective and efficient management of the service even during seasonal production peaks;

Selected and qualified suppliers

CSR strategy

EQUIPMENT

REMOTE CONTROL, CONNECTIVITY, SUSTAINABILITY

FEATURE:

- Thermoking branded Green Tech engines Model SLXI that drastically reduce:

Emissions

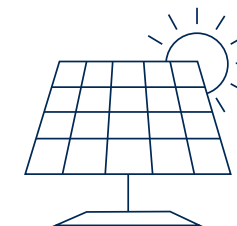

Waste
materials

Noise Pollution

Exceeding all the most stringent EU standards.

- Equipped with solar panels for charging and maintaining the batteries (solar battery charger)

RO-RO SHIPPING

THE SHIPS WE USE HAVE THE ADDITIONAL NOTATION OF "GREEN PLUS".

The "Green Plus" recognizes the design solutions, on-board systems and operational procedures put in place voluntarily, both during the construction phase and during the operation of the ship, aimed at improving environmental performance beyond the minimum levels required by the relevant international regulations.

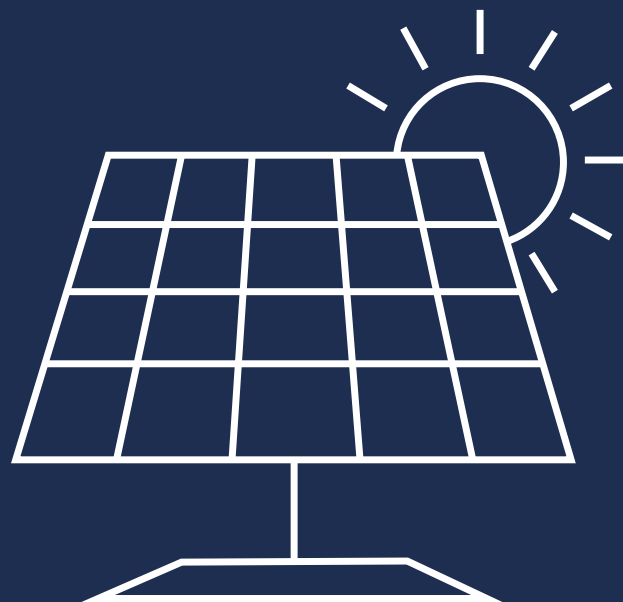

WAREHOUSE

WE AIM TO IMPROVE ENERGY EFFICIENCY THROUGH **A SUSTAINABLE DEVELOPMENT STRATEGY.**

We are constantly looking for **the most advanced design and construction techniques**, through proactive contracts with suppliers that significantly reduce consumption and the production of emissions.

At the end, we evaluate the performance results.

FOR MORE THAN A DECADE, ALL OUR MAIN STRUCTURES HAVE HAD PHOTOVOLTAIC SYSTEMS WHICH MAKE THE COMPANY PARTLY SELF-SUFFICIENT THANKS TO ETHICAL AND CLEAN ENERGY.

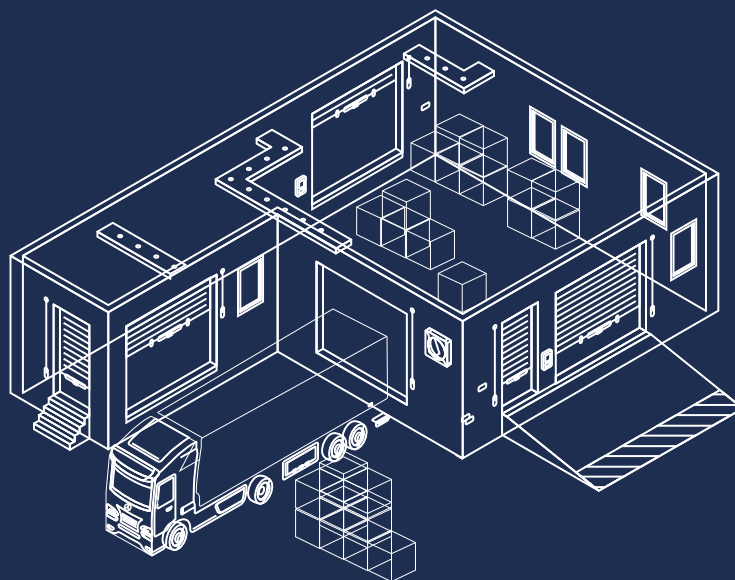

INTERNAL WAREHOUSE

IMPORT AND EXPORT MADE **EASY, EFFICIENT AND CHEAPER.**

We support you in the whole import- export process and suggest the most cost-effective way for this to be done in your international relations with non-EU countries.

During the time between the import and the clearance, goods stored in can be divided, mixed, bundled, labelled, branded etc., still under custom.

The warehouse can offer **all the benefit related to value added operations, and the advantages of producing them abroad.**
